

**DURAMON® 26** suitable for a large set of crops such as

Cereals and Pulses

Vegetable crops

Olive trees and other tree crops

Sugar crops

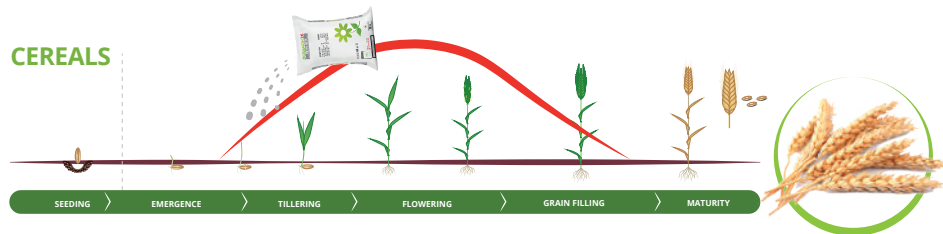

Red berries

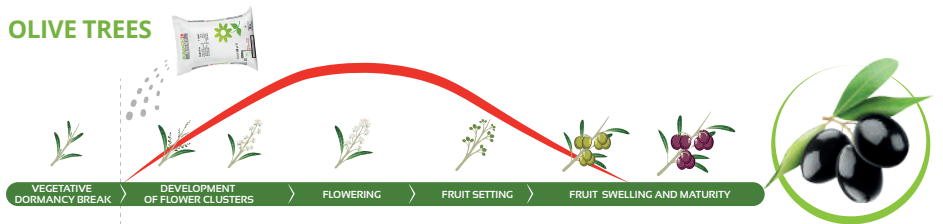

Other crops

**DURAMON® 26** some examples of fertilization programs

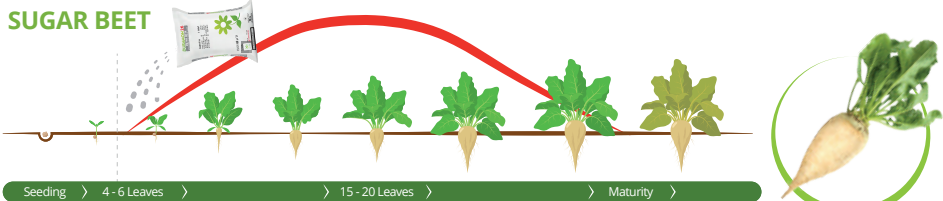

### CEREALS

### OLIVE TREES

### SUGAR BEET

# DURAMON® 26

**Slow release**  
NITROGEN FERTILIZER FOR A BALANCED FERTILIZATION

# DURAMON<sup>®</sup> 26

DURAMON<sup>®</sup> 26 Slow release nitrogen fertilizer, Distributed by OCP.

DURAMON<sup>®</sup> 26 based on the Duramon technology developed by our partner Fertinagro.

DURAMON<sup>®</sup> 26

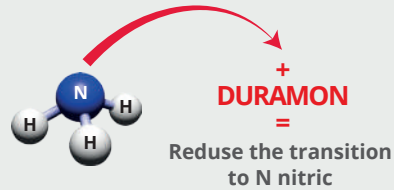

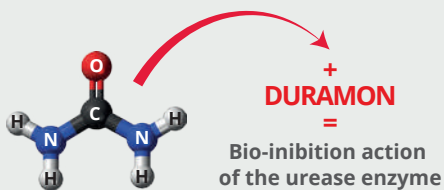

24% N<sub>Total</sub> 2% MgO 26% SO<sub>3</sub>

## ADVANTAGES

- DURAMON<sup>®</sup> 26 guarantees progressive and efficient provision of nitrogen throughout the crop cycle.
- DURAMON<sup>®</sup> 26 ensures a maximum reduction of losses due to washing and volatilization
- DURAMON<sup>®</sup> 26 ensures balanced crop nutrition in Sulphur and Mangesium, thanks to its high content of these elements.
- DURAMON<sup>®</sup> 26 contributes to the reduction of costs related to the Nitrogen fertilization

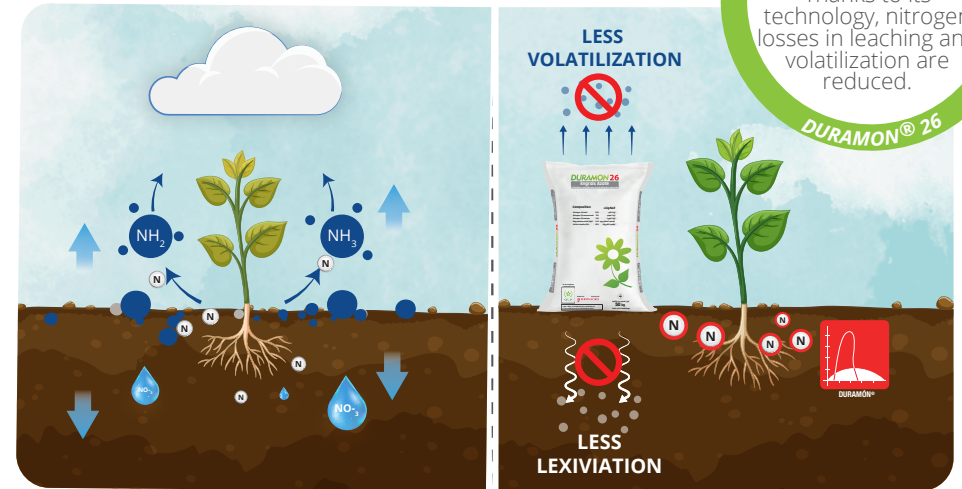

DURAMON technology reduces the activity of the UREASE enzyme, slows down the conversion of Urea nitrogen to ammonia and increases the availability of Nitrogen.

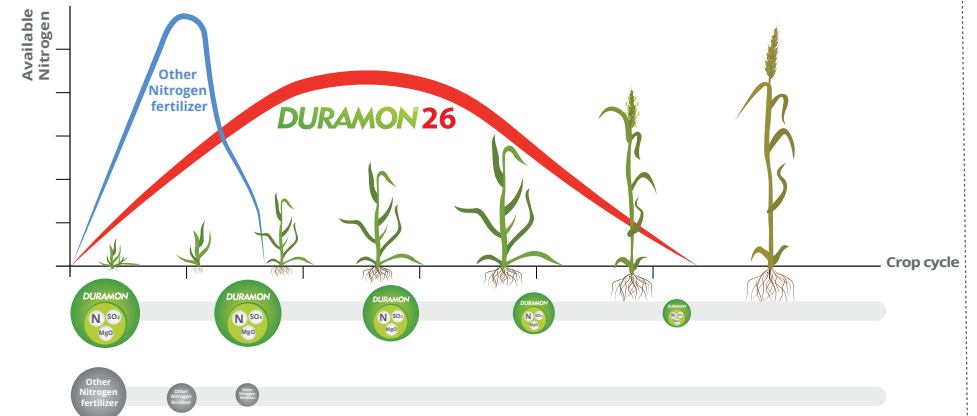

## BENEFITS

Le DURAMON<sup>®</sup> 26 prevents loss of Nitrogen

DURAMON<sup>®</sup> 26 is a slow release nitrogen fertilizer. Thanks to its technology, nitrogen losses in leaching and volatilization are reduced.

DURAMON<sup>®</sup> 26 guarantees maximum utilization of the fertilizer units supplied.

DURAMON<sup>®</sup> 26 is an efficient, economical and environmentally friendly fertilizing solution.
